WATER-BASED SOLUTIONS FOR CLADDING PAINTING

Lechler Coatings has established itself as a key partner in many areas of Industrial coatings since it first started producing coating solutions in 1858.

Manufacturing is based at 2 sites in Italy (Como and Perugia), and in 2012 Lechler operates all over Europe with sites in France, Spain, Germany and Middlewich, England.

These products have been extensively tested both in the R&D laboratory and also by professional applicators in the UK to ensure that they offer the best combination of durability and application. Tested over Cladding substrates they offer easy application, good adhesion combined with excellent gloss and appearance (always test adhesion before application).

QUICK DRYING AND EASY TO APPLY SPECIALLY FITTED FOR SPRAY AIRMIX SYSTEMS

Since the year 2000 Lechler have offered solutions for the coating of Cladding with a number of solvent based products, with the introduction of the Paint Product Directive and its impact on the products that can be used in the decorative market segment (as applied to the coating of Cladding) they have now launched the highly successful YD157 and YD158 HYDROCRYL 1K water based products Gloss and Matt with dedicated processes including an anticorrosive primer YD 101 Hydroprimer 1K for the coating of Cladding.

YD157 and YD158 have been developed to offer lower solvent solutions * for the painting of Cladding and other substrates commonly seen in the building refurbishment market. These single pack products have been developed in the specialist laboratory in Como and available in over 3000 solid and metallic colours (RAL, BS, NCS, Cladding Std. Colors Range etc...).

Lechler UK operates from premises in Middlewich near Manchester and as well as offering technical telephone help line also has a dedicated training centre and colour laboratory enabling fast turnaround of customer specific colours. Selling to the UK market via a network of independent specialised local distribution, the products are available nationally.

Designed to be user friendly as well as offering flexible gloss levels and a huge colour range Lechler Cladding products are offering cost effective and quality solutions for all Cladding and Building refurbishment requirements.

SINGLE PACK SOLUTION

TOPCOAT HYDROACRYL 1K GLOSSY YD 157 HYDROACRYL 1K MATT YD 158

This one-pack water borne acrylic Topcoat with Glossy (YD 157) and Matt (YD 158) effect, is available in all the RAL, British and Cladding Standards, NCS color charts. These formulations can be obtained with a "just in time" mixing machine by one of our Lechler Selling Points all over the United Kingdom. Customized colors and metallic effects are also all possible.
