

Your best practice evolving!

PW600 Power Wipes

AC-PRIMER

The easiest and fastest solution
to guarantee the greatest metal
surface protection in the Lechler
repair processes

Caring about the differences!

Efficiency before efficiency

Speed up further your repair process with an easy, rapid and reliable solution starting from the substrate protection !

PW600 Power Wipes

AC-PRIMER

Kit of moistened wipes with anticorrosive power for the protection and activation of metal surfaces and its alloys.

PW600 POWER WIPES AC PRIMER prepares the metallic substrates for the primer application with a simple operation taking a few minutes.

PW600 POWER WIPES AC PRIMER is free from chromates and it is recommended for steel, aluminium and galvanised steel surfaces.

As PW600 POWER WIPES AC PRIMER, is not actually a paint, it does not have any problems concerning pot-life and overspray, as it can be applied without spray guns and spray booths.

PW600 POWER WIPES AC PRIMER improves the efficiency level of the Lechler painting processes.

To complement the newest generation products such as MACROFAN AP AUTOLEVEL PRIMER and MACROFAN GREEN-TECH FILLER, PW600 POWER WIPES AC PRIMER now speeds up the substrate protection process.

PW600 POWER WIPES AC PRIMER is a very low VOC solution and it is recommended to maximise the POWER-TECH process efficiencies of the Lechler system.

PW600 POWER WIPES AC PRIMER belongs to the product line selected for the high efficiency painting processes in the LECHLER SYSTEM.

There is no right process for all repairs, but there is a right process for every repair.
