

## MACROFAN AIR-TECH MAX UHS CLEARCOAT

Productivity, energy  
savings and environmental  
sustainability

Caring about the differences!

# A BREATH OF FRESH AIR

## MC390 MACROFAN AIR-TECH MAX UHS CLEARCOAT

THE SOLUTION WITH ZERO  
CONSUMPTION  
ENERGY, MAXIMUM PRODUCTIVITY  
AND MINIMUM  
ENVIRONMENTAL IMPACT  
FOR ALL PAINTING PROCESSES  
THANKS  
TO ITS FLEXIBILITY OF USE

Two-pack Ultra High Solids  
clearcoat with high air drying speed  
and excellent aesthetic aspect,  
ideal for partial  
repairs (1-2 panels)  
requiring maximum speed  
and minimal energy costs.

Lechler further expands its proposal as part  
of AIR-Tech Processes to ensure **high productivity repairs**  
and **ZERO energy consumption** in every situation.

### AIR-TECH MAX benefits

- **Increase in productivity:** from application to delivery in just over 1 hour
- **Very low energy consumption,** thanks to the very fast drying with no forced drying
- **Very low environmental impact,** thanks to the low VOC level of the RFU product and to the elimination of emissions into the atmosphere from the burner

The AIR-TECH Process allows to **optimise work flows**  
and to **eliminate energy costs**, particularly critical factors  
in the field of partial repairs.

MACROFAN AIRTECH MAX  
UHS CLEARCOAT is part of the  
selected product line  
for High Efficiency Painting  
Processes

MACROFAN AIRTECH MAX  
UHS CLEARCOAT is part  
of the selected ECO-SUSTAINABLE  
product line for EHS Painting  
Processes

**There is no right process  
for all repairs,  
but there is a right process  
for every repair.**

Caring about the differences!
