HS CLEARCOAT

MC514 MACROFAN
ALUGLOSS
HS CLEARCOAT

THE IDEAL SOLUTION
FOR THOSE LOOKING FOR
MAXIMUM AESTHETIC
APPEARANCE COMBINED
WITH HIGH PERFORMANCE

Two-pack 4:1 acrylic clearcoat
for painting aluminium and its alloys,
available in the gloss (MC514)
and the matt version (MC515).

THE CLEARCOAT OF YOUR D-RIMS

Matt *or* Gloss

Lechler is further expanding its offering within the Refinish Clearcoat range to guarantee a solution to all the needs of its car painters, now also including the painting of wheel rims made of aluminium and its alloys.

The new clearcoats stand out for:

- **Ease of use** - very good application
- **Aesthetic look** - excellent flow both in gloss (95 gloss) and matt version (10 gloss)
- **Chemical performance** - good chemical and weather resistance
- **Mechanical performance** - good adhesion on various metallic substrates

MC514 MACROFAN ALUGLOSS HS CLEARCOAT can be mixed with the product MC515 MACROFAN ALUMATT HS CLEARCOAT to obtain different finish gloss levels.

Both envisage the use of a specific hardener (MH534).

There is no right process
for all repairs,
but there is a right process
for every repair.
