MACROFAN BOOST HS FILLER

More speed,
less impact.

Contains raw materials
from renewable sources

Caring about the differences!

A BOOST for your performance

ME702-06-10 MACROFAN BOOST HS FILLER

High solids bio-based acrylic filler with Power-Tech technology, formulated with raw materials from renewable sources, with high filling power and fast drying, ideal for all types of repairs.

A STEP FORWARD TOWARDS A MORE EFFICIENT, SUSTAINABLE, AND COMPETITIVE BODY SHOP.

BOOST IS A PROMISE OF REAL INNOVATION, FOR THOSE WHO WANT TO ACHIEVE MORE AND HAVE LESS IMPACT.

Lechler Refinish's proposal in the HS FILLER range is enriched with an even more **sustainable** and **versatile** solution.

MAIN CHARACTERISTICS AND BENEFITS:

- **Very good filling and sealing power**, without absorption of the overlying coats.
- **Speed of drying**, by baking and in the air in combination with the bio-based hardeners from the Ess&re line.
- **Productivity**, both in drying and in application with consecutive coats in the Power version.
- **Integration into the Grey Filler system**, with the possibility of creating the entire grey scale while optimising the finish opacity.
- **Environmental sustainability**, with low VOC level and approx. 30% of raw materials from renewable sources.

With **MACROFAN BOOST**, you can increase productivity without compromising quality: reduced drying times, streamlined processes and optimised energy consumption.
