

Your best practice evolving!

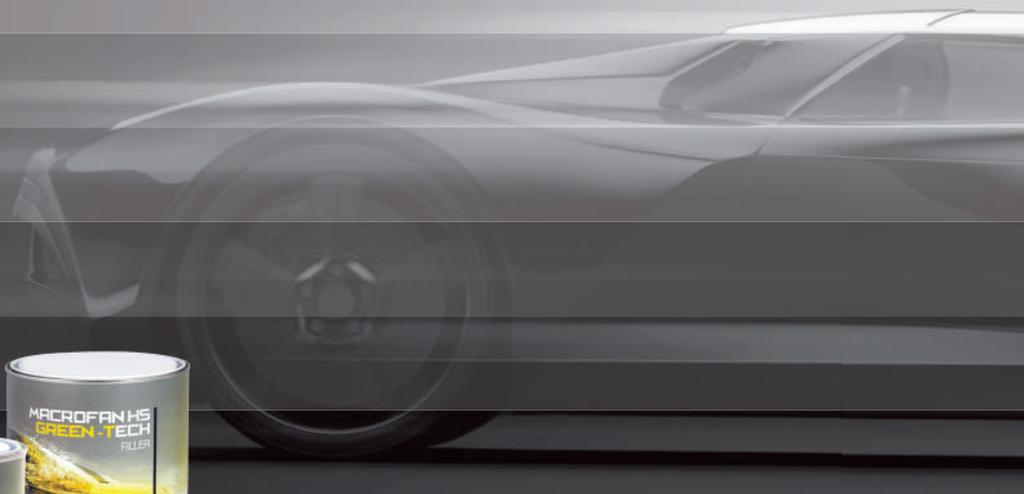

Fillers

The filler range is composed of a broad product offer allowing you to choose the correct product to achieve high efficiency painting processes and working methods.

Caring about the differences!

P9041-07/2023

The super filler
04001-04004-04007-04109 GREEN-TI FILLER

Filler in 4 colours. Its ease of use and its filling power make this product a "classic" of LECHLER's proposal for car refinish.

- High filling power above 200 µ.
- Extremely easy application
- Very easy sanding
- High coverage

High performance
04706-04710 MACROFAN HS HIGH FILLER

Highly performing filler in 3 colours. Ideal preparation product for the professional car painter.

- Excellent filling power
- Excellent sealing power
- Easy sanding
- Secure use

Pure sealer
04122 HI-GARD SEALER

Transparent acrylic sealer. Ideal as a preparation product in wet-on-wet systems.

- It doesn't contaminate door shuts
- Excellent flow
- Perfect adhesion on the substrate
- Colourable

Highest efficiency for new parts
MF302-MF306-MF310 MACROFAN AP AUTOLEVEL PRIMER

Primer/filler with direct adhesion on the main OEM substrates (cathodic coated substrates and plastics) in w/w as well as in d/d systems. Ideal for high productivity painting processes.

- Adhesion on cathodic coated substrates (without sanding) and on all plastics of the car field
- Good sealing power
- Excellent flow in w/w system
- Fairly good sanding in d/d system

Zero energy consumption, maximum productivity
MF402-MF406-MF410 MACROFAN HS AIR-TECH SEALER

Sealer with high air drying speed in 3 colours for wet-on-wet and dry-on-dry painting processes. Ideal for small touch ups where maximum speed and safety of the result are required.

- Very good sealing power
- Very good speed of air drying
- Easy application and workability
- Excellent overcoating up to 5 days

Maximum productivity for high build painting processes
MF602-MF606-MF610 MACROFAN HS GREEN-TECH FILLER

Very quick drying filler/sealer in 3 colours. For the car repair partner looking for fast application and drying as well as high filling power.

- Excellent filling power
- Excellent fast air drying and low baking
- Excellent sealing power also on spot repairs
- Easy sanding
- Fairly good anticorrosive power

Grey Filler System: All products (except 04122) are available in WHITE, LIGHT GREY and BLACK (or DARK GREY) version and can be mixed with each other to obtain the most suitable grey shade for the finish colour (see FILLER GREY SELECTOR, code P9122).

	Black	Grey 4	Grey 3	Light Grey	Grey 2	Grey 1	White
MF302-402-602		35	60		90	97	100
MF306-406-606				100			
MF310-410-610	100	65	40		10	3	

All products comply with the Directive 2004/42/CE/IIb (d) (540).
