

**Motorcycle  
Refinish**

Caring  
about  
the  
differences!

**LECHLER has always been a specialist in motorcycle coatings, as an O.E.M. supplier for important international brands such as: APRILIA, DERBI, DUCATI, MBK, MOTO GUZZI, MV AGUSTA, PEUGEOT, PIAGGIO, YAMAHA. Lechler is able to convey very high professional technological know-how to professional motorcycle and scooter repairers.**

Our offer is composed of particular chromatic effects, originally used by manufacturers using specific painting cycles through:

- Primers and Fillers with adhesion on all the surfaces used in the field: PRFG, carbon fibre, ABS, Polycarbonate, etc.
- Two- or three-coat HS BSB top coat systems and MACROFAN coloured fillers.
- BRILLIANT, CHROMA FLASH and FLUO special colour effects.
- HS and UHS MACROFAN clearcoats range with high performance.

Furthermore, Lechler also offer colour tools, training and technical assistance allowing you to paint and repair motorcycles in a highly professional way and guarantee an excellent final result.

The partnership agreements with associations such as THATCHAM together with specific technical approvals and the cooperation of A.S.I. (Historical motorcycle Italian register) for historical motorcycles and scooter repairs, make LECHLER a leader in this field.

## PRODUCTS

A complete offer specifically composed of products, systems and cycles which guarantee that the professional repairer can make repairs with an excellent final result.

### BSB HS SYSTEM

A tintometric system composed of solvent matt basecoats for high covering, two- and three-coat painting processes to obtain the following colour effects:

- SOLID
- METALLIC
- PEARL/MICA

The BSB HS System basecoats allow you to obtain more than 3,000 colours of the main European, North American and Asian motorcycle producers.

The systems are completed with the following special effects dedicated to the motorcycle field:

- BSB CHROMA FLASH with high light reflection and colour changing power
- SPARKLING GLASS aluminium with chrome effect
- BSB SIDERAL SILVER silver multi-light effect
- BRILLIANT COLORS colouring solutions for three-coat effects on white or silver completed by a UV Absorber additive for a stronger sunray resistance
- FLUO PIGMENTS bright pigments with high visibility for three-coat effects.

## FINISHING CLEARCOATS

A complete range of products allowing you to find the most suitable product for your demands:

- HS MACROFAN clearcoats: easy application, fast drying and high yield, available both in gloss and matt versions.
- HS MACROFAN clearcoats: thanks to their special formulations they guarantee high performance and high weather and chemical resistance.

## EQUIPMENT AND COLOUR TOOLS

### BRILLIANT COLORS FAN

Colour fan containing the three-coat effects obtainable with the BRILLIANT COLORS colorants, especially used in the motorcycle field.

### MASTER MOTOR 2

Modular colour catalogue with traditional colour chips for solid, metallic and mica/pearl motorcycle colours of the circulating fleet. They are contained in a practical box divided in sections.
